Where the walls of the buildings are not parallel, or are broken or otherwise irregular, the average distance between the principal buildings shall not be less than as specified above, and shall at no point be less than one-half ($\frac{1}{2}$) the required side yard for the zone in which the Project is located.
- (d) *Proximity to Drive.* A part of every residential building shall not be farther than one hundred sixty (160) feet from an access roadway or drive providing vehicular access from a public street. Residential buildings shall not be closer than five (5) feet to any access roadway or drive.

Density (d.u./net acre)	Usable Open Space Required (percent of net project area)
5 d.u./acre	5 percent
5 to 15 d.u./acre	20 percent
16 to 40 d.u./acre	15 percent
>40 d.u./acre	10 percent

The applicant's responsibility to create such a mechanism shall be noted on the development plan of the Group Residential Project. A requirement that each property owner be individually responsible for maintenance of the common space abutting the lot shall not be considered as acceptable for fulfilling the requirements of this section.
 - (k) *Other Requirements.* Except as modified herein, the Project shall conform to the requirements of this Zoning Ordinance for the zone in which it is located.

Sec. 9-7. Group residential projects in the infill and redevelopment area.

Projects in the Infill and Redevelopment Area shall follow the same procedures set out as provided in Sections 9-5 and 9-6 herein for Group Residential Projects, except that such Projects may utilize the following alternative minimum design standards:

- (a) *Provisions of the Underlying Zone.* Projects in the Infill and Redevelopment Area may choose to comply in whole with the height; front, rear and side yard setbacks; and parking requirements as for the underlying zone rather than with Sections 9-6(b) through 9-6(f) above.
- (b) *Bonus Floor Area.* The maximum floor area shall not exceed one hundred twenty-five percent (125%) of the otherwise permitted maximum floor area in the zone in which the Project is located, provided the required usable open space has not been granted a dimensional variance. Any Project that proposes a total floor area of more than one hundred percent (100%) of that permitted in the zone in which the Project is located, shall require that notice be provided to all property owners within four hundred (400) feet of the site, as outlined in Section 6-4(b) herein prior to Planning Commission consideration.
- (c) *Open Space Reductions.* For projects located within one thousand (1,000) feet of an existing LFUCG park space, the minimum required open space shall be reduced by fifty percent (50%).

Article 10 MOBILE HOME PARK (M-1P) ZONE

Sec. 10-1. Intent.

The intent of the Mobile Home Park (M-1P) zone is to permit the establishment of mobile home parks in areas which will provide a residential setting and which will be convenient to major traffic arterials. Because of unusual characteristics, mobile home parks pose special problems in the application of land use control techniques and require special consideration as to their proper location and character in relation to adjacent uses and to the proper integration of such uses into the community. The standards contained in this provision are intended to provide adequate protection and consideration for both the community and the mobile home dweller.

No minimum requirements.

~~Parking spaces may be located within the access road or driveway, provided that the portion thereof to be used exclusively for such parking is improved in accordance with the requirements of the Division of Engineering. The minimum width of an access road or driveway on which parking is permitted shall be twenty-nine (29) feet for one-side parking and thirty-eight (38) feet for both-side parking.~~

Article 16 GENERAL REGULATIONS FOR PARKING, LOADING AREAS, GARAGES, AUTOMOBILE SERVICE STATIONS, VEHICLE SALES LOTS AND STACKING AREAS VEHICULAR USE AREAS

Sec. 16-1. INTENT.

The intent of this article is to allow development that provides the off-street parking, loading, and circulation facilities needed to meet demands created by occupants, employees, visitors, customers, and patrons, and to improve local traffic patterns. The standards in this section ensure that all provided off-street parking and vehicular use areas allow for safe and equitable access to developments for all users, including drivers, pedestrians, transit-riders, and cyclists.

The standards are intended to implement policies that support new development and the revitalization of mixed-use urban areas that encourages pedestrian-oriented development, reduces excessive paved surface areas, and promotes environmental sustainability.

Sec. 16-12. General regulations for parking and loading and pedestrian areas.

- (a) *Parking or Loading Spaces Established Prior to Adoption or Amendment of This Zoning Ordinance.* Any parking or loading spaces established prior to the adoption or amendment of this Zoning Ordinance shall be governed by any certified Development Plan or approved site plan, as acted upon by the Planning Commission or Board of Adjustment, that are either used or are intended to be used in connection with any principal building, structure, or use; or any spaces designed and intended to comply with the requirements of this Zoning Ordinance for any such principal building or structure erected after that adoption or amendment date, shall hereafter be maintained, as long as said building, structure, or use remains (unless the owner provides and maintains, in another location, an equivalent number of spaces as required in conformance with the provisions of this Zoning Ordinance).
- (b) *Parking Requirements for a Change in the Principal Use.* Where the principal use is changed to a use for which additional parking space is required under the provisions of this Zoning Ordinance, it shall be unlawful to begin or maintain such altered use until the required off street parking is provided.
- (c) *Units of Measurement for Determining the Required Parking.* For the purpose of this Zoning Ordinance, the term "floor area" as used in computing the required off street parking or loading areas, shall mean "Parking Floor Area" as defined in this Zoning Ordinance. In stadiums, sports arenas, places of religious assembly, or other places of assembly where patrons or spectators occupy benches, pews, or other such seating facilities, each twenty four (24) inches of such seating facilities shall be counted as one (1) seat for the purpose of determining the requirements for off street parking spaces under this Zoning Ordinance. When units of measurement used in determining the number of required parking spaces would result in the requirement of a fractional space, any fraction less than one half ($\frac{1}{2}$) shall be disregarded, and fractions of one half ($\frac{1}{2}$) or more shall require one (1) parking space.
- (d) *Location of Parking Spaces.* The location of parking spaces shall be as hereinafter set forth; and where distances are specified, they shall be the walking distances measured from the nearest point of the parking facility to the nearest point of the building that such facility is required to serve. For one and two family dwellings, parking shall be provided on the same lot with the building it is required to serve; for multiple-family dwellings, not more than two hundred (200) feet from the building the parking spaces are required to serve; for uses located in or permitted in a Professional Office or any business zone (except B-2B); and for hospitals, nursing, convalescent and personal care facilities, orphanages, private clubs, fraternity or sorority houses, and places of religious assembly, not more than three hundred (300) feet from the building they are required to serve; for uses located in or permitted in any industrial zone and uses not specified above, not more than seven hundred (700) feet from the building, or other place of assembly, they are required to serve; and for all uses located in the B-2B zone, on any lot located within the B-2, B-2A, or B-2B zones, parking location shall be subject to the qualifications listed under the requirements of the B-2B zone.
- (e) *Loading and Unloading Spaces Required.* In any zone, every building or part thereof hereafter erected, with a floor area of ten thousand (10,000) square feet or more, which is to be occupied by manufacturing; compounding; processing; storage; warehousing; goods display; retail store; wholesale store; hotel; hospital; funeral parlor; laundry; dry cleaning; or other uses similarly requiring the receipt or distribution by vehicles of material, objects, or merchandise, there shall be provided and maintained on the same premises with such building at least one (1) off street loading space plus one (1) additional off street loading space for each twenty thousand (20,000) square feet or fraction thereof of floor area so used in excess of twenty thousand (20,000) square feet.
- (f) *Permit Requirement.* Permits are required for private walkways, parking, loading or unloading areas. Such permits shall not be issued until the applicant has met the design standards jointly promulgated by the

Division of Traffic Engineering and the Division of Building Inspection, the storm drainage requirements of the Division of Engineering, and all other requirements of the Zoning Ordinance.

(Code 1983, § 16-1; Ord. No. 153-87 , § 1, 7-9-1987; Ord. No. 307-2002 , § 1, 12-5-2002; Ord. No. 21-2013 , § 3, 3-7-2013; Ord. No. 166-2017 , § 8(16-1), 11-16-2017)

Sec. 16-23. Minimum design and maintenance requirements for parking areas.

Every parcel of land hereafter used as a parking area shall be designed and maintained in accordance with the following requirements:

- (a) Off-street parking areas shall equal or exceed the number of spaces required, shall be of useable shape and surface, and shall have convenient ingress and egress. Not less than seventy-five percent (75%) of the total provided required parking spaces shall be designed for use by full-size vehicles. Up to twenty-five percent (25%) of the provided required parking may be designed and designated for compact vehicles. Aisles and access drives shall be designed so as to provide adequate vehicular maneuvering wholly upon the property being served; and in no case shall off-street parking areas be permitted that encourage or require the backing onto, or maneuvering within, the right-of-way of any public or private street.
- (b) Any lighting used to illuminate off-street parking areas shall be arranged so as to reflect away from any adjoining residential zone or uses and any public or private right-of-way. Free-standing lighting shall be no taller than twelve (12) feet in height.
- (c) Any off-street parking area having more than one thousand, eight hundred (1,800) square feet of area and/or used by five (5) or more vehicles shall be landscaped and screened as required by Article 18, Landscape and Land Use Buffers.
- (d) A "sight triangle" shall be observed at all street intersections or intersections of driveways with streets as required in Article 18, Landscape and Land Use Buffers and Section 3-3 of this Zoning Ordinance.
- (e) All parking areas shall be paved and drained so as to dispose of all surface water within the parking area without carrying said water accumulation over a public sidewalk. Piping the water to a suitable outfall may be required.
- (f) Where parking areas are provided for five (5) or more vehicles or contain more than one thousand, eight hundred (1,800) square feet of area in a residential zone; or are enlarged or expanded to provide for five (5) or more vehicles or to contain more than one thousand, eight hundred (1,800) square feet of area, they shall be paved with an asphalt, concrete, brick or other properly bound surface, so as to be durable and dustless. Each parking space shall be physically delineated on the surface of the parking area. The parking area and driveway shall be paved with concrete, asphalt, brick, grass pavers, or other suitable hard surface materials as approved by the Division of Building Inspection.

Loose aggregate or other type of gravel is prohibited, except:

- (i.) for agricultural land uses,
- (ii.) as approved by the Board of Architectural Review for the purpose of historic preservation,
- (iii.) when approved by the Urban County Forester for the purpose of tree protection.

In any case, the applicant must show that there is not another reasonable alternative to the loose aggregate. Where decorative rock, or a similar product, is being driven on or being used for parking, it shall be considered loose aggregate and prohibited, except where described in this section.

- (g) Permanent stormwater management, in compliance with the stormwater manuals and accepted by the Division of Engineering, shall be provided for all off-street parking areas containing five (5) or more

parking spaces and/or more than one thousand, eight hundred (1,800) square feet. For off-street parking areas of one thousand, eight hundred (1,800) square feet or less, or less than five (5) parking spaces, permanent stormwater retention may be required by the Division of Engineering upon the determination that the lack of such retention would cause or aggravate flooding or other drainage problems on surrounding property.

(Code 1983, § 16-2; Ord. No. 153-87 , § 1, 7-9-1987; Ord. No. 307-2002 , § 1, 12-5-2002; Ord. No. 166-2017 , § 8(16-2), 11-16-2017)

- (b) Such parking shall be situated on premises not less than five thousand (5,000) square feet in area which shall abut at least fifty (50) feet, either directly or across an alley, on a Professional Office or business (except B-2B) zone, or on the premises of the existing conforming or non-conforming ~~commercial/institutional~~ use to which the parking area is accessory.
- (c) ~~Such parking area shall be used solely for the parking of passenger automobiles. No commercial repair work or service of any kind shall be conducted, and no charge shall be made for parking. No sign of any kind, other than designating ownership, entrances, exits, and conditions of use, shall be maintained on such parking area. Such signs shall conform to the zone in which the parking area is established.~~
- (d) Each entrance and exit to and from such parking area shall be at least twenty (20) feet distant from any adjacent lot line located in any residential zone.
- (e) The parking area shall be subject to all requirements of this Zoning Ordinance concerning surfacing, lighting, landscaping, screening, and minimum yards and setbacks.
- (f) Any permit issued by the Division of Planning for such parking area may be revoked any time that the aforementioned requirements are not complied with; and any permittee who uses the premises in violation of any of the conditions specified above, or attached as conditions to such permit by the Board of Adjustment, shall be deemed in violation of this Zoning Ordinance.

The parking area and driveway shall be paved with concrete, asphalt, brick or other suitable hard surface materials, as~~

approved by the Division of Building Inspection. Loose aggregate or other type of gravel is prohibited, except as approved by the Board of Architectural Review for the purpose of historic preservation, or when approved by the Urban County Forester for the purpose of tree protection. Article 18 LANDSCAPE AND LAND USE BUFFERS

Sec. 18-1. Intent.

The intent of this Article is to improve the appearance of vehicular use areas (VUAs) and property abutting public rights-of-way; to require buffering between incompatible land uses; and to protect, preserve and promote the aesthetic appeal, character and value of the surrounding neighborhoods; to promote public health and safety through the reduction of noise pollution, air pollution, visual pollution, air temperature, and artificial light glare.

(Code 1983, § 18-1)

Sec. 18-2. Sites affected.

- (a) *New Sites.* No new site development, building, or structure shall hereafter be constructed or vehicular use area created or used unless landscaping is provided as required by the provisions of this Article.
- (b) *Existing Sites.* No building, structure, or vehicular use area (VUA) shall be expanded, moved, or removed and/or reconstructed unless the minimum landscaping required by the provision of this Article is provided for the property to the extent of its alteration or expansion, but not for the entire property.
- (c) *Change of Use.* No use shall be changed to another use for which the Zoning Ordinance requires additional parking over and above that required for the previous use, unless vehicular use area perimeter landscaping as required by this Article is provided for such additional parking. The provisions of this section shall be effective regardless of whether or not new construction is necessary to meet the parking requirements for the new uses. Where new construction will not be necessary to meet the parking requirements, such additional required parking shall be deemed to be on the perimeter for as much as possible of the existing vehicular use area. Where the previous use had no required parking, perimeter landscaping shall be provided for the entire vehicular use area serving the new use. Interior landscaping shall not be required where only the use of the property is changed and no new construction or reconstruction is proposed.
- (d) *Change of Zone.* No use of an existing building, structure, or vehicular use area shall be commenced subsequent to a change in zoning unless property perimeter landscaping as required herein has been provided.

(Code 1983, § 18-2)

Sec. 18-3. Where landscape materials required.

This section describes the minimum requirements that shall be met in regard to interior and perimeter landscaping for vehicular use areas, perimeter landscaping for incompatible land use areas, and landscaping for service areas.

- (a) *Perimeter Landscaping Requirements.* Unless otherwise provided, landscape materials shall be installed to provide a minimum of fifty percent (50%) winter opacity and a seventy percent (70%) summer opacity, between one (1) foot above finished grade level to the top of the required planting, hedge, fence, wall, or earth mound within four (4) years after installation. The required landscaping shall be provided along the property perimeter in designated landscape buffer areas (LBAs) as shown in the chart in Subsection (a)(1) of this section or adjacent to the vehicular use area as shown in the chart in Subsection (a)(2) of this section. A "Planting Manual" and a "Plant Materials List" shall be maintained

by the Division of Planning and available in the offices of the Division of Environmental Services, to provide more detailed information on the acceptable plant material.

(1) *Property Perimeter Requirements.*

1. Any M-1P zone.	Any property in any zone other than M-1P.	Ten feet adjacent to all common boundaries, including street frontage.	One tree/40 feet of linear boundary, OFT ² , from Group A, B, or C of Plant List plus continuous six feet high planting, hedge, fence, wall or earth mound.
2. Any office or business zone (except P-2).	Any residential zone.	15 feet adjacent to all common boundaries (located behind the building line) except street frontage. ⁷	One tree/40 feet of linear boundary, OFT, from Group A or B only, plus, 1) a double row of six feet high hedge or 2) a six feet high fence, wall or earth mound.
3. Any industrial or P-2 zone.	Any residential, office, or business zone.	15 feet adjacent to all common boundaries except street frontage ⁷⁹ .	Same as 2D.
4. Any double frontage lot (as defined by the Subdivision Regulations) in any zone except A-U, A-R, A-N and A-B unless the lot is used for a vehicular sales facility or a service station.	Any state maintained freeway or arterial street not providing direct access to the property.	20 feet for residential zones and ten feet for all other zones adjacent to freeway or arterial.	One tree/30 feet, OFT, Group A or B, plus continuous six (6) feet high planting, hedge, wall, fence (not to exceed eight feet in height at street grade) or earth mound. Such plantings are to be shown on a unified plan for the development.
5. Any zone except agricultural and industrial zones.	Railroads (except spur tracks and along sight triangles)	Same as 6C, adjacent to railroad boundaries.	Same as 2D.
6. Utility substation, junk yards, landfills, sewage plants, sewage pump stations, transfer stations or similar uses. 	for single-family or two-family occupancy.			planting, hedge, fence, wall, or earthmound.
8.	Any business, office, or industrial zone.	Any A-R zone.	15 feet adjacent to all common boundaries except street frontage.	One tree/40 feet of linear boundary, OFT ² , of native species from Group a of Plant List plus continuous six feet high planting or hedge or, 1) one evergreen tree/15 feet of linear boundary, OFT, planted 15 feet o.k.; or 2) one tree/20 feet of linear boundary, OFT, that is a combination of 50 percent deciduous, native species trees from Group A and 50 percent evergreen trees or small flowering trees.
9.	Any residential, business, office, or industrial zone.	Urban Service Area boundary.	Five feet adjacent to all common boundaries except street frontage. ⁶	Same as 1D, except use only native tree species from Group A.
10.	Any cemetery use, whether private or public.	Any property boundary, including street rights-of-way.	50 feet adjacent to all boundaries, as shown on a development plan or subdivision plan.	One tree/40 feet of linear boundary, OFT, from Group A or one tree/30 feet from Group B, plus continuous six feet high planting, or hedge, in addition to a wall or fence a minimum of three feet in height.

1. Grass or ground cover shall be planted on all portions of the landscape buffer area not occupied by other landscape material.
2. OFT means "or fraction thereof." Unless otherwise specified, trees do not have to be equally spaced, but may be grouped.
3. To determine required area of landscape buffer area, multiply required averaged width by length of common boundary. Using item 1C as an example, the ten-foot average required width times an assumed 100 feet of common boundary equals 1,000 square feet of required landscape area. Thus, if some sections of the landscape buffer area are only three feet in width, other sections will have to be greater than ten feet in width in order to attain the required one thousand (1,000) square feet of landscape area.
4. Five feet shall be the least dimension for any P-1, B-1, B-2, B-2A, B-2B, B-3, B-4, I-1, or I-2 zone with three feet as the least dimension for any other zone.
5. A continuous planting of evergreen trees 15 feet o.c. Shall be deemed to meet the requirements for trees and a continuous planting provided the trees meet the requirements of Section 18-4(c) and an opacity of 70 percent is achieved.
6. No map amendment request, major subdivision plan, or development plan shall be approved by the Planning Commission except in compliance with this section. However, the Planning Commission shall not require such landscaping adjoining the Urban Service Area boundary where any of the following conditions

exist: major railroad lines, major water bodies (not including streams or farm ponds), publicly owned parks or open space, public property with a low intensity of use, or existing urban development along the Urban Service Area boundary.

7. The 15-foot Landscape Buffer Area (LBA) may be reduced to five feet when used in conjunction with a six-foot high wall or fence.

8. In situations where a slope occurs along a boundary, the required landscaping shall be placed (in relation to the slope) where it will most effectively screen the more intensive use from the adjoining property.

9. In conjunction with the required development plan in a P-2 zone, the Planning Commission may permit portions of required perimeter planting to be reallocated to areas interior to the site. This shall be permitted for areas where the Commission finds that such solid screening is not necessary or desirable to screen the P-2 uses from adjoining properties or right-of-way. For example, where such uses as open space areas, outdoor recreation areas, large open yards, and the like adjoin the abutting rights-of-way of adjoining properties, the Commission should consider utilizing the reallocation provision of this section.

(2) **Vehicular Use Area Perimeter Requirements:**

(a) A vehicular use area perimeter buffer shall be located between vehicular use areas containing 1,800 sq. ft. of area and/or used by five or more of any type of vehicle and any adjacent streets and adjacent properties excluding required sight clearances at driveways and ingress/egress locations. A vehicular use area perimeter buffer shall not be required when a vehicular use area is contiguous to a required property perimeter buffer and the screening intent of this Article is met.

(b) Vehicular Use Area Perimeter Requirements shall be required as follows:

(1) The vehicular use area perimeter buffer shall be located along the perimeter of a vehicular use area and maintain a minimum average width of eight (8) feet, as measured from the outer edge of the vehicular use area. The buffer shall contain:

(i) A continuous hedge, fence, wall, or earthen mound, except where trees require breaks.

(a) Hedges shall be composed of a double staggered row of evergreen shrubs, deciduous shrubs, and/or warm season grasses with a minimum planting height of 30 inches and planted three feet on-center.

(1) Up to 25 percent may be deciduous.

(2) Plant material other than groundcover shall be located at least three (3) feet from the back edge of the curb where cars overhang.

(b) Fences or walls shall be opaque and shall be a minimum of four (4) feet in height.

(ii) One (1) canopy tree (Group A or B) per twenty-five (25) linear feet of the total perimeter of the parking area.

(a.) Trees shall be located at least six (6) feet from the back edge of the curb where cars overhang.

(b.) In areas where overhead utilities prevent the use of canopy trees (Group A or B), understory trees (Group C) may be substituted.

When the following...	Adjoins the following...	A minimum landscape buffer area of this width is required ³	Which will contain this material, ³ to achieve opacity required.
1. Any vehicular use area ² (VUA) on any property	Any property in any zone except Industrial (I 1, I 2) Downtown Business Core (B-2), Downtown Business Frame (B-2A), Lexington Center Business (B-2B), or Agricultural (A-U, A-R, A-N or A-B)	Five feet to edge of paving where vehicles overhang, four feet minimum from edge of paving and three feet (that prohibits any vehicular overhang) for other areas, adjacent to portion of vehicular use area that faces adjacent property.	One tree/40 feet of boundary of vehicular use area OFF ⁴ , from group A, B, or C, plus a three feet average height continuous planting, hedge, fence, wall or earth mound or a three feet decrease in elevation from the adjoining property to the vehicular use area.
2. Any vehicular use area in any zone outside the B-2, B-2A, or B-2B zones, except vehicle sales facilities or service stations. ¹. These provisions may be included within the property perimeter landscaping required by Subsection (a)(1) of this section where landscape buffer areas are also applicable.

~~2. A vehicular use area (V.U.A.) is any open or unenclosed area containing more than 1,800 square feet of area and/or used by five or more, of any type of vehicle, whether, moving or at rest, including, but not limited to, parking lots, loading and unloading areas, mobile home parks, and sales and service areas. Driveways are considered to be vehicular use areas whenever they are adjacent to public streets or other vehicular use elements described previously in this paragraph (and intervening curbs, sidewalks landscape strips, etc., do not eliminate adjacency).~~

~~3. Grass or ground cover shall be planted on all portions of the landscape buffer areas not occupied by other landscape material.~~

~~4. OFT means "or fraction thereof."~~

~~5. In the B-2, B-2A, and B-2B zones, when a wall is used, it is to be constructed of natural stone, brick or precast concrete.~~

- (3) *Who Provides Landscape Buffer Area.* The landscape buffer area and material required adjacent to any vehicular use area under Subsection (a)(2) of this section shall be provided by the person in charge of or in control of the property whether as owner, lessee, tenant, occupant or otherwise (hereinafter referred to as "owner"), unless the authority building the street has fully met all requirements on the street right-of-way. When adjacent to other common boundaries, the landscape buffer area and materials:
- (a) May be placed on either adjoining parcel, or astride the boundary, if both are owned and being processed by the same owner; or
 - (b) ~~Generally shall be placed on the property with the vehicular use area the activity listed under Column A of Subsections (a)(1) and (a)(2) of this section~~ when adjoining parcels have different owners; or
 - (c) May be placed astride the boundary of adjoining parcels having different owners if a written agreement, signed by both owners, is filed with the Division of Environmental Services as a public record; or
 - ~~(d) Shall be placed on the activity or parcel being processed when adjoining property is already developed with the exception of Subsection (a)(1) of this section, lines 4 and 5; or~~
 - ~~(ed.) Shall not be required along the common boundary if the requirements of this Article have been fully complied with on the adjoining property, in fulfillment of the requirements of this ordinance. A note indicating the maintenance of the shared boundary shall be included on the approved landscape plan.~~
- (4) *Requirement Conflicts.* Whenever a parcel or activity falls under two (2) or more of the landscape requirements listed ~~in the table of Subsections (a)(1) or (a)(2) of this section~~, the most stringent requirements will be enforced.
- (5) *Landscaping in Easements.* The required landscape buffer area may be combined with a utility or other easements as long as all of the landscape requirements can be fully met, otherwise, the landscape buffer area shall be provided in addition to, and separate from, any easement. Trees to be planted in utility easements containing overhead lines shall be only those specified in the Plant List. Cars or other objects shall not overhang or otherwise intrude upon the required landscape buffer area more than ~~two and one half (2½)~~ ~~three (3)~~ feet, and wheel stops or curbs will be required.
- (6) *Street Trees in the Right-of-Way.* Trees required as a part of the vehicular use area perimeter landscaping may be placed on the right-of-way adjoining such vehicular use area when approved by the Division of Environmental Services ~~and the Street Tree Coordination Committee~~. Where street trees required by the Subdivision Regulations have already been planted in the right-of-

way, such trees may be substituted for an equal number of vehicular use area VUA-perimeter trees. Written permission from the authority having jurisdiction over the right-of-way shall be submitted by the developer prior to the approval of a landscape plan which utilizes the right-of-way for vehicular use area VUA perimeter landscaping. The Division of Environmental Services shall permit the required vehicular use area VUA-perimeter trees to be located in the right-of-way only if there is sufficient area for such trees to grow to maturity.

- (7) *Existing Landscape Material.* Existing landscape material which is proposed to be used to fulfill landscape requirements shall be shown on the required plan, and any material in satisfactory condition may be used to satisfy these requirements in whole or in part when, in the opinion of the Division of Environmental Services such material meets the requirements and achieves the objectives of this Article. Existing healthy trees from Group "A" or "B" of the Plant List may be substituted for trees required for property or vehicular use area perimeter landscaping, or for interior landscaping by using the following criteria: a six-inch to twelve (12)-inch caliper tree surrounded by a minimum of one hundred fifty (150) square feet of landscape area may be substituted for two (2) new trees of the required minimum size; a twelve (12)-inch to twenty-four (24)-inch caliper tree surrounded by a minimum of two hundred fifty (250) square feet of landscape area may be substituted for three (3) new trees of the required minimum size; a twenty-four (24)-inch or greater caliper tree surrounded by a minimum of three hundred (300) square feet of landscape area may be substituted for four (4) new trees of the required minimum size.
- (8) *Landscaping at Driveway and Street Intersections.* To ensure that landscape materials do not constitute a driving hazard, a "sight triangle" will be observed at all street intersections or intersections of driveways with streets as required by Section 3-2 herein.
- (9) *Joint Driveways and Common Vehicular Use Areas.* Vehicular use area screening shall not be required between a vehicular use area and the adjoining property where a property line divides a driveway used for common access to two (2) or more properties nor when a final development plan for the properties has been approved by the Planning Commission, both of the following conditions exist:
- The vehicular use areas are for the required parking for the properties or the common use of the properties (as substantiated by a reciprocal parking and access agreement);
 - A final development plan for the properties has been approved by the Planning Commission.
- (b) *Interior Landscaping for Vehicular Use Areas.* Any open vehicular use area (excluding loading, unloading, and storage areas in an industrial zone, I-1 or I-2, or warehouse business zone, B-4) containing six-five thousand (65,000) or more square feet of area, or twenty (20)fifteen (15) or more vehicular parking spaces, shall provide interior landscaping in addition to the previously required perimeter landscaping. Interior landscaping shall be peninsular or island types. Where a vehicular use area is altered or expanded to increase the size to six-five thousand (65,000) or more square feet of area, or twenty fifteen (2015) or more vehicular parking spaces, interior landscaping for the entire vehicular use area shall be provided and not merely to the extent of its alteration or expansion.
- (1) Landscape Area. For each one hundred (100) square feet, or fraction thereof, of vehicular use area, five (5) square feet of landscaped area shall be provided in all zones except the P-2 zone. In the P-2 zone, ten (10) square feet of landscaped area shall be required for each one hundred (100) square feet of vehicular use area.
- (a1) Minimum Interior Landscape Area. The minimum interior landscape area shall be ten (10%) percent of the total vehicular use area, excluding loading, unloading, and storage areas in a Wholesale and Warehouse Business (B-4), Light Industrial (I-1), Heavy Industrial (I-2), or

Economic Development (ED) zone permitted shall be sixty four (64) square feet, with a four foot minimum dimension to all trees from edge of pavement where vehicles overhang.

- (b) Maximum Contiguous Area. In order to encourage the required landscape areas to be properly dispersed, no required landscape area shall be larger than three hundred fifty (350) square feet in vehicular use areas under thirty thousand (30,000) square feet in size, and no required area shall be larger than one thousand, five hundred (1,500) square feet in vehicular use areas over thirty thousand (30,000) square feet. In both cases, the least dimension of any required area shall be four (4) feet minimum dimension to all trees from edge of pavement where vehicles overhang. The maximum distance between landscape areas shall be one hundred twenty (120) feet measured from the closest perimeter landscape area curb edge or the closest curb edge of each required interior area. Landscape areas larger than above are permitted as long as the additional area is in excess of the required minimum.
- (e2) Minimum Interior Vehicular Use Area Trees Canopy. Tree canopy equal to or exceeding thirty percent of the total vehicular use area shall be provided, including loading, unloading, and storage areas in a Wholesale and Warehouse Business (B-4), Light Industrial (I-1), Heavy Industrial (I-2), or Economic Development (ED) zone. In areas where overhead utilities prevent the use of canopy trees (Group A or B), understory trees (Group C) may be substituted. Mature trees shall have a clear trunk of at least eight (8) feet above the ground. Clustering is permitted within the interior landscape areas. A minimum of one (1) tree shall be required for each two hundred fifty (250) square feet or fraction thereof of required landscape area. Trees shall have a clear trunk of at least five (5) feet above the ground. The remaining area shall be landscaped with shrubs, or ground cover, not to exceed two (2) feet in height.
- (d) Vehicle Overhang. Parked vehicles may hang over the interior landscaped area no more than two and one half (2½) feet, as long as concrete or other wheel stops are provided to ensure no greater overhang or penetration of the landscaped area.
- (3) Alternative Tree Locations for loading/unloading zones or storage areas in the Wholesale and Warehouse Business (B-4), Light Industrial (I-1), Heavy Industrial (I-2), or Economic Development (ED) zones – where required tree canopy cannot be accommodated within the required vehicular use area interior landscape areas the remaining trees shall be planted elsewhere on the site.
- (4) Location for Interior Landscape Areas
- A maximum distance of ninety (90) feet between interior landscape areas.
 - At the end of every row of parking there shall be an interior landscape area.
 - Every other row of double-loaded parking requires a continuous interior landscape area.
- (5) Interior Landscape Area without Trees
- Minimum Area - Seventy-two (72) square feet as measured from front of curb.
 - Plant Material Required - Low shrubs, ground cover, herbaceous cover or native warm season grass to cover at least seventy-five (75%) percent at maturity.
 - Vehicle Overhang – Plant material other than groundcover shall be located at least three (3) feet from the back edge of curb, where vehicles overhang.
- (6) Interior Landscape Area with Trees
- Minimum Area – One Hundred and forty-four (144) square feet per tree as measured from front of curb.
 - Minimum Top Soil Depth – Three (3) feet.

- (c.) **Plant Material Required** - At least one canopy tree from Group A or Group B; In areas where overhead utilities prevent the use of canopy trees (Group A or B), understory trees (Group C) may be substituted. Trees shall be underplanted with low shrubs, ground cover, herbaceous cover or native warm season grass to cover at least 75% at maturity.
- (d.) **Vehicle Overhang** – Trees shall be located at least four (4) feet from the back edge of curb, where vehicles overhang.
- (e7) **Landscaping for Service Structures**. All service structures shall be fully screened except when located in a R-1, R-2, B-4, I-1 or I-2 zone or when located more than thirty-five (35) feet above the established grade. Service structures in the B-4, I-1 or I-2 zone shall be fully screened when located within one hundred (100) feet of any zone except B-4, I-1 or I-2. For the purpose of this Article, service structures shall include propane tanks, air-conditioning units and condensers, electrical transformers and other equipment or elements providing service to a building or a site.
- (a1) **Location of Screening**. A continuous planting, hedge, fence, wall, or earth mound shall enclose any service structure on all sides unless such structure must be frequently moved, in which case screening on all but one (1) side is required. The average height of the screening material shall be one (1) foot more than the height of the enclosed structure, but shall not be required to exceed eight (8) feet in height. Whenever a service structure is located next to a building wall, perimeter landscaping material, or vehicular use area landscaping material, such walls or screening material may fulfill the screening requirement for that side of the service structure if that wall or screening material is of an average height sufficient to meet the height requirement set out in this section. Whenever service structures are screened by plant material, such material may count towards the fulfillment of required interior or perimeter landscaping. No interior landscaping shall be required within an area screened for service structures.
- (b2) **Protection of Screening Material**. Whenever screening material is placed around any trash disposal unit or waste collection unit which is emptied or removed mechanically on a regularly occurring basis, a fixed barrier to contain the placement of the container shall be provided within the screening material on those sides where there is such material. The barrier shall be at least eighteen (18) inches from the material and shall be of sufficient strength to prevent possible damage to the screening when the container is moved or emptied. The minimum front opening of the screening material shall be twelve (12) feet to allow service vehicles access to the container.
- (d8) **Screening of Outdoor Storage Areas**. All outdoor storage areas in the I-1 and I-2 zones shall be screened by a solid wall or fence not less than six (6) feet in height.
- (g) **Innovative Design Landscape Plan**. Interior landscaping requirements for vehicular use areas may be modified on a development plan without a variance in accordance with an Innovative Design Landscape Plan. An Innovative Design Landscape Plan shall be prepared and sealed by an architect, landscape architect or engineer licensed to practice in the State of Kentucky.

The plan may include, but is not limited to:

- a. Green infrastructure elements above and beyond existing requirements,
- b. Provisions for solar or alternative energy production,
- c. Vegetated areas that do not meet one or more of the above regulations, but still achieve the basic objectives of these regulations.

The plan shall be reviewed and approved by the Landscape Review Committee; and a finding shall be made by the Planning Commission and noted on the Final Development Plan. Such

finding shall state that the proposed interior landscaping for the vehicular use area utilizes innovative landscape design elements to promote public health and safety through the reduction of noise pollution, air pollution, visual pollution, air temperature, and artificial light glare in accordance with Article 18-1.

Sec. 18-4. Landscape materials.

The landscaping materials shall consist of the following, and are described in more detail in the Planting Manual and Plant Materials List available at the Division of Planning and the Division of Environmental Services.

- (a) *Walls and Fences.* Walls shall be constructed of natural stone, brick or other weatherproof materials arranged in a linear, serpentine, or other alignment; while fences shall be constructed of wood or other weatherproof, durable materials generally used in the exterior construction of buildings. Fence posts shall be structurally stable based on the material used, and shall have a maximum spacing of 8' on center (o.c.). If wood is used, the posts shall be 4" x 4" minimum. Posts shall be set in or anchored to crowned concrete footers at least six (6) inches larger in each direction than the post it supports. The base of the footer shall be at least twenty-four (24) inches below finished grade. If wood is used for any member, it shall be softwood treated with water-borne preservative to the American Wood Preservers Institute standard LP-2 for above ground use or LP-22 for ground contact use, or all heart redwood, or all heart cedar. All cut surfaces of pressure treated lumber shall be waterproofed. If another material is used, it shall be weatherproof. Slats are to be minimum one-half ($\frac{1}{2}$) inch in thickness and are to be placed on the outside of the fence unless the design is two-sided (shadow-box, etc.). All hardware is to be galvanized or otherwise rust-proofed. Wood horizontal members shall be installed bark-side up. Chain link fencing may not be used to meet the requirements of this Article. Chain link fencing may be installed in the required landscape area only if it is in addition to the required continuous planting, hedge, fence, wall or earth mound. All walls or fences shall have a minimum opacity of eighty (80) percent. Walls and fences allowed to meet the requirements of this Article shall not be used for the erection or display of any sign or other advertising device. Height limitations for walls and fences are regulated by zone and land use in Article 15-4(b).
- (b) *Earth Mounds.* Earth mounds shall be physical barriers which block or screen the view similar to a hedge, fence, or wall. Mounds shall be constructed with proper and adequate plant material to prevent erosion. A difference in elevation between areas requiring screening does not constitute an earth mound.
- (c) *Plants.* All plant materials shall be living plants (artificial plants are prohibited) and shall meet the following requirements:
 - (1) *Quality.* Plant materials used in conformance with provision of this Zoning Ordinance shall conform to the standards of the American Association of Nurserymen and shall have passed any inspections required under State regulations. Bare root plants, with the exception of shrubs and hedges, vines and ground covers shall be prohibited.
 - (2) *Deciduous Trees.* (Trees which normally shed their leaves in the Fall) - Shall be species having an average mature crown spread of greater than fifteen (15) feet in Fayette County and having

trunk(s) which can be maintained with over five (5) feet of clear wood in areas which have visibility requirements. Trees having an average mature spread of crown less than fifteen (15) feet may be substituted by grouping of the same so as to create the equivalent of a fifteen (15) crown spread. A minimum of ten (10) feet overall height or a minimum caliper (trunk diameter, measured 6 inches above ground for trees up to 4 inches caliper) of at least one and three-fourths (1½) inches immediately after planting shall be required. Trees of species whose roots are known to cause damage to public roadways or other public works shall not be planted closer than fifteen (15) feet to such public works, unless the tree root system is completely contained within a barrier for which the minimum interior container dimensions shall be five feet square and five feet deep and for which the construction requirements shall be four (4) inches thick, reinforced concrete. Columnar variety trees of any species may only be permitted upon the express approval of the Division of Environmental Services in accordance with Section 18-6. Any columnar variety tree shall be considered as a small tree and be granted new canopy credit of 100 square feet according to Article 26-5(e).

- (3) *Evergreen Trees.* Evergreen trees shall be a minimum of five (5) feet high with a minimum caliper of one and one-half (1½) inches immediately after planting.
 - (4) *Shrubs and Hedges.* Shall be at least twelve (12) inches with three (3) canes for Section 18-3(a)(2), lines 3 and 5, at least two (2) feet with three (3) canes for all other lines of Section 18-3(a)(2), and three (3) feet with four (4) canes for Section 18-3(a)(1) in average height when installed. After approval by the Division of Environmental Services and with the exception of the 12-inch plants, shrubs and hedges may be pruned to one-half (½) the height in accordance with accepted horticultural practices. All plants shall conform to opacity, mature height, and other requirements within four (4) years after the date of the final approval of each planting or replanting. Privet (*Ligustrum* species) cannot meet the opacity requirements and may not be used to satisfy the requirements of this Article. The height of the planting shall be measured from the level of the surface of the vehicular use area at the edge closest to the screening.
 - (5) *Vines.* Shall be at least twelve (12) or fifteen (15) inches high at planting, and are generally used in conjunction with walls or fences.
 - (6) *Grass or Ground Cover.* Grass of the fescue (*Gramineak*) or Bluegrass (*Poaceae*) family shall be planted in species normally grown as permanent lawns in Fayette County, and may be sodded, plugged, sprigged, or seeded; except in swales or other areas subject to erosion, where solid sod, erosion reducing net, or suitable mulch shall be used, nurse-grass seed shall be sown for immediate protection until complete coverage otherwise is achieved. Grass sod shall be clean and free of weeds and noxious pests or diseases. Ground cover such as organic material shall be planted not more than fifteen (15) inches on center and in such a manner as to present a finished appearance and have seventy-five (75) percent of complete coverage after two (2) complete growing seasons. In certain cases, ground cover also may consist of rocks, pebbles, sand, and similar approved materials.
- (d) *Maintenance and Installation.* All landscaping required by this Article shall be installed and maintained by the owner in compliance with the standards specified in Section 4 of the Planting Manual and the American National Standards (ANSI A300) and, as applicable, the requirements specified in Lexington-Fayette Urban County Government Ordinances No. 1-91 and No. 34-92 (Man o' War Boulevard), No. 134-89 (Old Frankfort Pike), No. 133-89 (Georgetown Road), No. 213-83 and No. 266-87 (Richmond Road), No. 42-98 (Downtown Street Trees), and No. 85-2008 (Newtown Pike), all available in the offices of the Division of Environmental Services; or any other future amendments to these ordinances. Any landscape material that fails to meet the minimum requirements of this Article at the time of installation shall be removed and replaced with acceptable materials. The person in charge of, or in control of, the property, whether as owner, lessee, tenant, occupant, or otherwise, shall be responsible

for the continued proper maintenance of all landscaping materials and shall keep them in a proper, neat and orderly appearance, free from refuse and debris, at all times. All unhealthy or dead plant materials shall be replaced within one (1) year, or by the next planting period, whichever comes first; while other defective landscape material shall be replaced or repaired within three (3) months. Sizes for the above-mentioned replacements shall be as provided in Subsection (c)(2) of this section. Topping trees or the severe cutting of limbs to stubs larger than three (3) inches in diameter within the tree crown to such a degree as to remove the normal canopy shall not be considered proper or permitted for the maintenance of trees as required by this Article. Except as provided above, the removal of landscape materials requires the approval of the Division of Environmental Services. When trees are removed, other than as permitted above, such trees shall either be replaced with the necessary number two and one-half (2½)-inch caliper trees to equal the total caliper of trees removed, or with trees of the same caliper as those that were removed. All replacement trees shall be planted in the original location unless an alternate location is approved by the Division of Environmental Services. Violation of these installation and maintenance provisions shall be grounds for the Division of Building Inspection to refuse a building occupancy permit, or for the Division of Environmental Services to require replacement of landscape material or institute legal proceedings to enforce the provisions of this Article.

Sec. 18-5. Plan submission and approval.

Whenever any property is affected by these landscape requirements, the property owner or developer shall submit a landscape plan to the Division of Environmental Services. For any property where a vehicular use area for twenty (20) or more vehicles or six thousand (6,000) or more square feet is provided, the landscape plan shall be prepared and sealed by an architect, landscape architect or engineer licensed to practice in the State of Kentucky. For any property, where a vehicular use area for fifty (50) or more vehicles is provided, the landscape plan shall be prepared and sealed by a landscape architect licensed to practice in the State of Kentucky. The requirements of this Article shall be followed in approving or disapproving any landscape plan required by this Article. Landscape plans also may be submitted as part of any development plan required by the Planning Commission. Such "combination plans," however, shall be first submitted to the Division of Environmental Services for its approval or disapproval of the landscape portion of the plan.

(a) *Plan Content.* The contents of the plan shall include the following:

- (1) Plot plan, drawn to an easily readable scale, showing and labeling by name and dimensions, all existing and proposed property lines; easements; buildings and other structures; vehicular use areas (including parking stalls, driveways, service areas, square footage, etc.); water outlets and landscape material (including botanical name and common name, installation size, on center planting dimensions where applicable, and quantities for all plants used);
- (2) Existing and proposed contours at two-foot intervals;
- (3) Typical elevations and/or cross-sections as may be required;
- (4) Title block with the pertinent names and addresses (property owner, person drawing plan, and person installing landscape material), scale, date, north arrow (generally orient plan so that north is to top of plan), and zone;
- (5) Requirements or an approved tree protection plan applicable to the site, per Article 26, Tree Protection Standards.

-
- (b) *Building Permit and Certificate of Occupancy.* Where landscaping is required, no building permit shall be issued until the required landscaping plan has been submitted and approved; and no Certificate of Occupancy shall be issued until the landscaping is completed as certified by an on-site inspection by the Division of Environmental Services. If the required landscaping has not been completed and a Temporary Certificate of Occupancy is issued under Section 5-4(a) of this Zoning Ordinance, a full cash bond or irrevocable letter of credit from a banking institution with offices in Fayette County shall be posted at that time. The amount of the bond or letter of credit shall be based upon the cost of the proper installation of the uninstalled landscape material shown in the submitted plan, with the cost certified by a landscape contractor. The amount of the bond or letter of credit shall also include an inflation factor and/or administrative contingency cost of no more than twenty-five percent (25%) of the base cost, as determined by the Division of Environmental Services, to complete the work in the event of the foreclosure of the bond or letter of credit.
- (c) *Posting of a Full Cash Bond or Irrevocable Letter of Credit.* After a full cash bond or irrevocable letter of credit has been posted, the landscaping material required in the approved landscaping plan shall be installed within three (3) months after the date of posting the full cash bond or irrevocable letter of credit. A one-month extension of the planting period may be granted by the Division of Environmental Services upon a demonstration by the property owner or developer that such an extension is warranted because of adverse weather conditions or unavailability of required plant materials. No more than three (3) such one-month extensions may be granted. The full cash performance bond or irrevocable letter of credit shall be called if the required landscaping has not been installed by the end of the approved planting period, and the Division of Environmental Services shall apply the proceeds of the bond or letter of credit to have the work completed.

Sec. 18-6. Planting manual and plant materials list.

Developers shall refer to the Planting Manual and Plant Materials List, which are available at the offices of the Division of Planning and the Division of Environmental Services for minimal requirements to use in meeting the provisions of this Article. Any materials that are not on the Plant Materials List shall be considered on an individual basis to determine the suitability of the specific plant in the proposed location. A plant not on the Plant Materials List shall be permitted only upon the expressed approval of the Division of Environmental Services.

(Code 1983, § 18-6; Ord. No. 124-2017 , § 6, 8-31-2017)

Sec. 18-7. Variances.

Any landscape plan submitted to, and disapproved by the Division of Environmental Services because it does not meet the requirements of this Article, may be appealed within sixty (60) days of such action to the Board of Adjustment.

- (a) *Landscape Review Committee.* To aid the Board of Adjustment in the performance of the duties imposed by this Article, there is hereby created a Landscape Review Committee.

The Division of Planning shall perform staff service for the committee. Meetings shall be held at regularly scheduled times, or at the call of the chairman, or by joint action of two (2) members. In any case, notification shall be given to all members at least six (6) days prior to any meeting. A quorum shall consist of three (3) members, and official recommendations may be decided by the vote of two (2) members when a quorum is present.
- (d) *Reviewing Variance Requests.* The committee, in its review of said recommendations on variance requests, shall base its recommendations on all of the following criteria:

- (1) The requested variance arises from special circumstances which generally apply to land in the general vicinity or in the same zone.
 - (2) The strict application of the provisions of this Zoning Ordinance would deprive the applicant of a reasonable use of the land or would create unnecessary hardship on the applicant.
 - (3) Such special circumstances are not the result of actions of the applicant subsequent to the adoption or amendment of this Zoning Ordinance.
 - (4) Reasons that the variance will adversely effect the public health, safety and welfare, and will not alter the essential character of the general vicinity, and will not cause a hazard or a nuisance to the public.
- (e) *Recording.* Whenever the committee makes a recommendation, such recommendation shall be forwarded to the Board of Adjustment, the Division of Environmental Services, and be properly described in the committee's minutes.

Sec. 21-1. Intent and purpose.

The purpose of this Article is to establish and define development plans which may be utilized for a wide variety of planning related procedures. (Code 1983, § 21-1)

(Supp. No. 4)

Created: 2021-12-09 06:36:23 [EST]

-
- (a) ***On-Site Meeting.*** Prior to the submission of a development plan, the owner/developer shall contact the Urban Forester who will determine if an on-site meeting with the developer's design professional and/or other pertinent Urban County Government staff is necessary.
 - (b) ***Filing.*** To formally request Planning Commission action on the development plan, the developer shall file a completed application form, filing fee and copies of the plans as required by the Commission's adopted filing and fee schedules with the Division of Planning. The Division of Planning shall make copies of the plan available to all other concerned agencies.
 - (c) ***Review.*** The Division of Planning and concerned agencies shall review the development plan, and then meet together as a Technical Committee to try to resolve all differences and to make recommendations to the Commission's Subdivision Committee. The Subdivision Committee will review all recommendations, and then forward their recommendations to the Commission. These Committee meetings shall be open to the developer and to any interested citizen; however, each Committee may impose rules which control participation by non-members in attendance. The developer may secure recommendations from the staff at any of the review checkpoints, and proceed to make plan changes so that revised plans may be submitted to the remaining review groups.
 - 1. The Subdivision Committee shall have the authority to require an applicant to prepare a traffic impact study for significant developments per Article 6-1(a). These Committee meetings shall be open to the developer and to any interested citizen; however, each Committee may impose rules which control participation by non-members in attendance. The developer may secure recommendations from the staff at any of the review checkpoints, and proceed to make plan changes so that revised plans may be submitted to the remaining review groups.
 - 2. The Subdivision Committee shall have the authority to require an applicant to prepare a Parking Demand Mitigation Study for significant developments per Article 16-14.
 - (d) ***Commission Action.***

No development plans shall be considered for action by the Commission until they have been reviewed by, and recommendations made by the Subdivision Committee unless this requirement is waived by the Commission under its adopted late filing procedures. All development plans shall be approved or disapproved within ninety (90) days of the date they are formally filed for Commission action with the Division of Planning, unless the developer agrees to a longer time period. However, in the case of a development plan filed in conjunction with a map amendment request, the Planning Commission may postpone the development plan until after the Urban County Council has made its decision on the map amendment request. For cases such as these, the Commission shall either approve or disapprove the development plan within sixty (60) days of the date of Council action on the map amendment request unless the developer agrees to a longer time period.

The Commission will review the Subdivision Committee's recommendation and then act for approval, conditional approval with conditions noted, postponement, or disapproval. The Commission may modify or disapprove the development plan if it finds the plan does not comply with the requirements of this Zoning Ordinance, and when applicable, the Land Subdivision Regulations or if it finds there are existing or potential flood, drainage, traffic, topographic, health, safety, nuisance or other similar problems relating to the development of the subject property. In addition to these items, development plans which seek to amend the original development plan or its approved amendments shall also be subject to the provisions of Section 21-7(e) hereinbelow. Reasons for action of postponement or disapproval shall be fully incorporated in the Commission's minutes. The following actions by the Commission shall have the meanings so stated:

 - (1) ***Approval.*** Means the development plan is ready to be certified by the Commission's Secretary with no further corrections or revisions of the plan required by the developer.

-
- (1) The developer shall meet with the Division of Planning no later than five (5) working days in advance of the filing deadline to discuss the appropriateness of filing a combined plan.
 - (2) The plan shall show all information required for a development plan (preliminary or final as appropriate) and all information required for preliminary subdivision plans as set forth in Section 5-2 of the Land Subdivision Regulations.
 - (3) Provisions relating to the timing of public or private streets or other public or common use improvements in relation to the timing of building permit issuance may be required.
- (d) *Preliminary Subdivision Plan May Be Substituted for Development Plans Required in Conjunction with map amendment request.* It is recognized that in certain cases, a preliminary subdivision plan would be as appropriate or more appropriate to be considered in conjunction with a map amendment request than a development plan. Generally, such situations involve developments where placement of structures will be tightly controlled by the streets, lot pattern, and the requirements for placement of structures within the zone, and where the developer sees fit to have plans prepared at the required level of detail for subdivisions plans prior to receiving a zone change approval. When a developer is required to provide a development plan under Section 21-3(c) hereinabove, and the developer desires to file a subdivision plan in its place, the developer shall meet with the Division of Planning in advance of filing the map amendment request to discuss the appropriateness of a substitution. In any disputed cases, the Planning Commission shall make the final judgments as to whether a development plan or subdivision plan is required.

Article 23 EXPANSION AREAS ZONING CATEGORIES AND RESTRICTIONS

Sec. 23-1. Purpose.

As a part of adoption of the Comprehensive Plan, the Planning Commission adopted an Expansion Area Master Plan (EAMP) element, which sets forth provisions to guide growth within designated Expansion Areas (EA) to Lexington-Fayette County's Urban Service Area. The Expansion Area Master Plan is intended to establish a new approach to development coordination and regulation than has been previously used within the existing Urban Service Area. The Expansion Area Master Plan encourages innovative design and a range of uses which are integrated into the development; encourages development which is sensitive to the topographic features and the unique rural character of the Bluegrass; encourages the new development within the Expansion Area to function as a "community" with a mix of uses, housing types and land for economic development and community facilities, including parks, public facilities, and community centers. The purpose of this Article and its appendices is to provide the necessary implementing regulations to achieve the goals of the Expansion Area Master Plan.

No minimum requirements.

Conditional Uses. The Board of Adjustment may establish additional requirements as needed.

- (h) *Special Provisions.* Special provisions shall be as follows:
1. No less than fifteen percent (15%), nor more than eighty-five percent (85%), of the floor area of any structure shall be required to be residential uses, except where multiple principal structures are involved. In such cases, mixing within a single structure shall not be required after the fifteen percent (15%) minimum mix of residential to nonresidential uses has been achieved in multiple-use structures. Once the MU-2 project has reached ten thousand (10,000) square feet of commercial use, additional commercial square footage will not be required.
 2. For any MU-2 project located on a site recommended for "Professional Services" in the Comprehensive Plan, uses first permitted in the P-1 zone shall be required on at least seventy-five percent (75%) of the nonresidential floor area of the project. 4. When MU-2 zoning is applied to a site where an existing structure is adapted for mixed use, and sufficient parking does not exist, the level of non-conformity may be permitted to remain.
